

AI Clone Detection Report

LOW THREAT

Report ID: INV-20260811131733
Generated: 11 Aug 2026, 12:06 UTC

No strong clone indicators found

The current analysis indicates a low likelihood of identity cloning. Continue normal monitoring as new information becomes available.

Assessment at a glance

THREAT LEVEL	TRUST SCORE	CLONE LIKELIHOOD	DECISION
Low	95 / 100	5.0%	Genuine

Evidence summary

SIGNAL	OBSERVATION	WHY IT MATTERS
Face similarity	0.0%	High values can indicate visual identity overlap.
Username similarity	14.3%	Similar handles can be used to impersonate an account.
Biography similarity	23.4%	Similar biography text can indicate copied profile content.
Face verification	No match / not verified	A verification match is treated as an additional identity-overlap signal.
