

AI Clone Detection Report

CRITICAL THREAT

Report ID: INV-20260812043738
Generated: 12 Aug 2026, 04:37 UTC

Potential identity clone detected

The combined signals indicate a material impersonation risk. Treat this account as unsafe until a manual review is complete.

Assessment at a glance

THREAT LEVEL	TRUST SCORE	CLONE LIKELIHOOD	DECISION
Critical	25 / 100	75.0%	CLONE DETECTED

Evidence summary

SIGNAL	OBSERVATION	WHY IT MATTERS
Face similarity	68.0%	High values can indicate visual identity overlap.
Username similarity	94.0%	Similar handles can be used to impersonate an account.
Biography similarity	72.0%	Similar biography text can indicate copied profile content.
Face verification	Match	A verification match is treated as an additional identity-overlap signal.

Profiles reviewed

ORIGINAL PROFILE	SUSPECTED PROFILE

RECOMMENDED NEXT STEP

Immediately preserve evidence, report the suspected account, and complete a manual identity review.

Interpretation note

This report is a decision-support record generated from the supplied profile and model signals. It should be reviewed alongside platform evidence and applicable policies before irreversible action is taken.
