

AI Clone Detection Report

HIGH THREAT

Report ID: INV-20260812222133
Generated: 12 Aug 2026, 17:07 UTC

High-risk identity clone indicators found

The available evidence indicates a likely impersonation attempt. A manual review and timely containment are recommended.

Assessment at a glance

THREAT LEVEL	TRUST SCORE	CLONE LIKELIHOOD	DECISION
High	45 / 100	55.0%	Clone

Evidence summary

SIGNAL	OBSERVATION	WHY IT MATTERS
Face similarity	68.0%	High values can indicate visual identity overlap.
Username similarity	66.7%	Similar handles can be used to impersonate an account.
Biography similarity	19.9%	Similar biography text can indicate copied profile content.
Face verification	Match	A verification match is treated as an additional identity-overlap signal.
